

Execution & Traceability

Light up production data for optimal shop floor velocity

Detect correctable issues the moment production trends away from an optimal state! Our Execution and Traceability solution lets you easily collect and display product-related data from machines, operators, IT systems and other sources.

Using intuitive dashboards, our solution provides the answers you need to keep processes running smoothly. Workflow and data validation ensure that personnel adhere to standards and leaders are equipped to make smarter decisions.

Execution & Traceability key benefits:

- Record and report exactly what is happening on your shop floor without paper, spreadsheets and other time-consuming, manual processes.
- Empower your workforce and control your value stream by removing obstacles for consistency and efficiency.
- Accurately monitor performance, quality and availability to precisely measure overall equipment effectiveness (OEE).
- Gain deep insights into the data required to inform the right people.
- Know if production is winning or losing at any given time.
- See performance at every level of the business to gain the visibility you need to drive continuous improvement.
- Move away from manual data mining and paper reports.

See it. Solve it.

Gain actionable insights to empower course correction.

Increase OEE

Reduce inventory

Improve quality

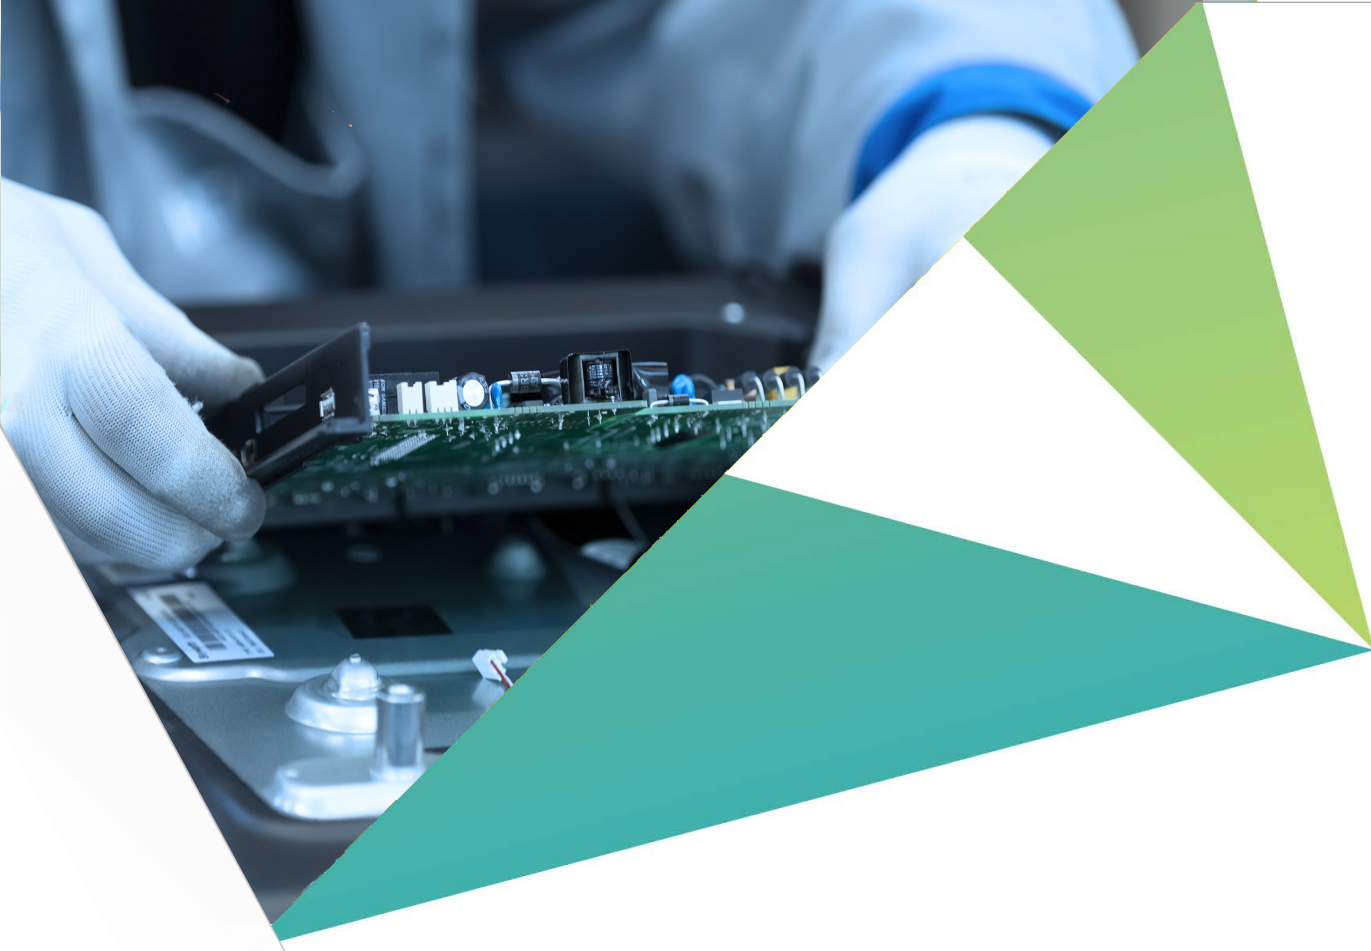

Ensure accountability

Eliminate bottlenecks

Plan accurately

Hexagon's Xalt Solutions' Execution and Traceability enables the convergence of varying data sources including IT systems and human and machine data sources.

Xalt conforms to the customer's ideal business processes rather than requiring the customer to implement changes to fit Xalt. Don't let a software application dictate the way you run your business!

The secret sauce is process adherence, where we've forced new paradigms of culture and accountability in a very mindful and organized way to create an environment of autonomy. This is decentralizing our data, allowing everyone to know what is going on at any point in time, from anywhere."

- Facilities Engineering Manager, Mueller

Accelerate your digital transformation

Hexagon is a global leader in digital solutions that improve productivity and quality for manufacturing, infrastructure, safety and mobility applications. We create Smart Digital Realities that empower the future of autonomy across production and urban ecosystems.

Hexagon's Xalt Solutions accelerates your digital transformation by solving your workplace challenges with the industry's most agile framework, supported by innovative, tailored solutions.
