

## Smart Audit

Ensure process adherence and operator accountability

SFx Smart Audit provides simple, visual mobile workflows that guide operators through their daily checks. Complete with step-by-step digital checklists, these workflows ensure that line operators check what matters on schedule, providing visual instructions dynamically tailored to each asset.

Smart Audit prevents errors and omissions, and immediately escalates issues as they arise. Information collected informs and enables leadership to make smart decisions and prioritize activities.

### Smart Audit key benefits:

- Eliminate paperwork and dual data entry through direct integration with asset management or ERP.
- Organize data into an analytics-ready format.
- Provide real-time collaboration between operations and maintenance by automatically generating work orders and escalating issues.
- Mitigate worker turnover issues through clear visual instructions.
- Ensure operator audits are performed correctly and consistently using step-by-step instructions.
- Enforce process adherence with data validation rules.
- Reduce unplanned downtime due to changeover or setup negligence.
- Inform your next Gemba walk with completed line walk data.
- Perform any task from any device.
- Shift focus from people to processes and behaviors.

## Workflow with smart checklists ensure accountability.

Set and maintain operational standards with digital, visual tools.

**Ensure safety and compliance**
