

HxGN™ Smart Build Industry Insider Program

HxGN Smart Build has officially launched as part of our Construction Insight suite of products! We are gathering a group of select industry insiders (we are capping this round at 5 contractors), looking for individuals who would like an early, exclusive look at the product in exchange for feedback. By partnering with Hexagon, you are helping us gain the momentum we need to change the industry for the better!

Total time commitment is only a few days (max) spread out over a 30- to 60-day period. We will place the product in your hands and walk alongside you as we explore some of the basics of Smart Build including:

- Model and schedule importing, connecting and viewing (4D)
- AWP (Advanced Work Packaging) creation and progressing
- Issue workflows
- Model-based point extraction and field layout
- Laser scanning/point cloud integration and model compare
- Possible 5D cost integration (if data available and time-permitting)

We ask that you bring your own data to use in the system including:

- Model files in .RVT or .IFC formats
- P6 or Microsoft Project project schedule from same project as models
- Cost data if you want to play with the 3D cost-mapping

The timeline for this engagement will be completely up to your schedule. You can either follow our guidelines and “sandbox” Smart Build on your own and provide feedback, or we can go through a more guided training session-style approach virtually. Either way, we are excited to engage with you as we launch into the industry in 2020!

Please email Jon Deming at jon.deming@hexagon.com or via [LinkedIn](#) direct message. We will evaluate your fit and discuss details on how to get underway. Please understand that this is an exclusive group and we will cap the group to a small number of contractors based on a combination of fit and first to respond. Come change the world with us!

hexagonppm.com/offerings/solutions/construction-insight

Hexagon is a global leader in sensor, software and autonomous solutions. We are putting data to work to boost efficiency, productivity, and quality across industrial, manufacturing, infrastructure, safety, and mobility applications.

Our technologies are shaping urban and production ecosystems to become increasingly connected and autonomous — ensuring a scalable, sustainable future.

Hexagon's PPM division empowers its clients to transform unstructured information into a smart digital asset to visualize, build and manage structures and facilities of all complexities, ensuring safe and efficient operation throughout the entire lifecycle.

Hexagon (Nasdaq Stockholm: HEXA B) has approximately 21,000 employees in 50 countries and net sales of approximately 3.9bn EUR. Learn more at [hexagon.com](https://www.hexagon.com) and follow us @HexagonAB.
