

Google Cloud Platform

Unlock the power of the Google Cloud for your organization

Why Google Cloud Platform?

Use Google Cloud Platform (GCP) for your most demanding cloud and big data workloads while leveraging robust analytics and machine learning capabilities. GCP provides everything needed to build and scale. From virtual machines and containerization with proven price/performance advantages to a fully managed, serverless app development platform, you have the tools to help your teams do their best work, alongside best-in-class monitoring, logging and diagnostic tools.

What is Google Cloud Platform?

GCP is powered by Google's global network data centers all connected by private fiber. GCP provides both Infrastructure as a Service for virtual machines and containers and cloud storage, as well as technology services for big data, machine learning, language translation and even reCAPTCHA. GCP's planet-scale computing is one of the world's largest and fastest private networks. It is secure, global, high-performing, cost-effective and consistently improving.

Infrastructure as a Service *Instances, Storage, Containers*

Compute Engine

Cloud Storage

Cloud Networking

Container Engine

Technology as a Service *Serverless, Machine Learning, Big Data*

BigQuery

App Engine

Cloud SQL

Cloud Dataflow

Cloud Functions

Tensor Flow

Cloud AI

Put Google Cloud Platform to work for your business

Flexibility. Deploy what you want, the way you want.

Scalability & performance. Grow your deployment without limitations while maintaining the highest levels of performance to provide the best user experience.

Security. Utilize Google's secure cloud infrastructure.

Reliability. Leverage the most available commercial cloud.

Affordability. Pay only for what you consume; minimize capital expenditures.

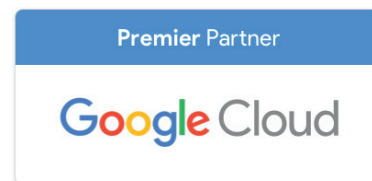

Innovation. Experience serverless architecture, machine learning and big data as a service.

How to get started

Hexagon has been a Premier Google Partner for more than a decade. We are trained, certified and knowledgeable. We can help implement a personalized GCP strategy for your business that includes efficient deployment and optimized usage for a strong ROI.

Make the most of Google Cloud Platform for your business. **Contact us** today to find out more about working with Hexagon as your Premier Google Partner.

About Hexagon

Hexagon is a global leader in sensor, software and autonomous solutions. We are putting data to work to boost efficiency, productivity, and quality across industrial, manufacturing, infrastructure, safety, and mobility applications.

Our technologies are shaping urban and production ecosystems to become increasingly connected and autonomous - ensuring a scalable, sustainable future.

Hexagon's Geospatial division creates solutions that deliver a 5D smart digital reality with insight into what was, what is, what could be, what should be, and ultimately, what will be.

Hexagon (Nasdaq Stockholm: HEXA B) has approximately 21,000 employees in 50 countries and net sales of approximately 4.4bn USD. Learn more at [hexagon.com](https://www.hexagon.com) and follow us @HexagonAB.
