

j5 Operations Logbook Overview

The Problem

On every industrial site, there is a stream of operations, maintenance and safety events occurring at all levels and areas within the process. Unfortunately, there are still inadequate, time-consuming methods such as paper, word processor, spreadsheet and homegrown applications being used to log these events. This increases organisational risk and inefficiencies.

Crucial daily information such as shift handover reports can be error prone and take time to aggregate. This information is also poorly categorized, time-consuming to retrieve and not widely accessible. Poor traditional methods of data logging are not integrated with other software, such as Data Historians and CMMS systems, resulting in dual capture and information silos.

How j5 Operations Logbook Provided the Solution

To remedy these pains, companies across the world utilize the j5 Operations Logbook. This application allows their operations teams to record, manage and view any event in a consistent and efficient way with a web browser and mobile device.

j5 Operations Logbook users have reported the following benefits:

- Easy to use
- Consistent logs
- Simple customization
- Wide visibility of operations data
- Eliminates paper, spreadsheets and scattered databases
- Saves time and improves accuracy
- Advanced workflow capabilities
- Fast search and filtering
- Integration with other systems
- Real-time events monitoring

“j5 has contributed to the efficient and stable operation of INPEX assets. Information is standardized and accurate.”

Jinsen Li
