

SMARTPLANT® P&ID VIRTUAL TRAINING

BENEFITS

- **Improve flexibility** – Master the material at your own pace. Study from home or the office, 24/7.
- **Reduce training costs** – Eliminate travel expenses.
- **Boost productivity** – Maximize labor hours on existing projects.
- **Increase efficiency** – Share best practices and consistent methodologies. Ensure everyone receives approved training.
- **See the results** – Receive regular reports that detail user activity.
- **Accelerate learning** – Quickly train large numbers of users. Scale up or down to meet project demands.

SmartPlant® P&ID Virtual Training courses offer in-depth training with the convenience of never having to leave your office. Interactive, instructor-led courses are designed to help you develop valuable skills and learn in an intuitive, innovative selfstudy format. Instruction is engineering workflow-driven, not command-centered.

COURSE INFORMATION

Each course provides one individual an Internet login to the lessons available. Each lesson can be replayed as often as requested during the one-year access period. **Each course is priced per student, per course, per year of access.**

ONLINE VIRTUAL TRAINING CONSISTS OF:

- **Virtual Instructor-led Sessions** – These online courses provide a brief overview of a SmartPlant P&ID task, followed by a demonstration of the capability or procedure. A short quiz is presented at the end of each session.
- **Tutorials** – Adobe PDF documents provide detailed instruction related to a concept or procedure in SmartPlant P&ID. Tutorials provide a step-by-step description of a procedure, similar to procedure demonstrations in instructor-led sessions. You can view the documents and then save them for later reference.
- **Practice Labs** – PDF documents summarize the procedures covered during instructor-led sessions and tutorials. Practice labs are useful for practicing the steps offline using the SmartPlant P&ID environment.

Online training does not include access to the SmartPlant P&ID software or environment.

EXPAND YOUR POSSIBILITIES

Virtual training is perfect for people who find it difficult to leave the office. Plus, students who simply prefer self-study can enjoy the benefits of taking lessons at their own pace.

A virtual course can serve as an introduction to a topic prior to traditional instructor-led training. It can also be used as a “how-to” refresher for someone who has already experienced instructor-led training.

GET STARTED TODAY

To purchase a course, please contact your local account manager. Once the purchase order is processed, you will be sent an activation key that enables one year of access to the course. The course is activated immediately so that you can start learning right away.

Course Number	Title	Online Virtual Training Module
SKVT487AE	Creating P&IDs with SmartPlant P&ID	This course is designed for engineers and designers who will use SmartPlant P&ID to generate intelligent P&IDs.
