

Hexagon Conflict Minerals Policy

As a global leader in sensor, software and autonomous solutions, Hexagon has a responsibility to uphold the highest standard of ethics and compliance in all business activities and regions in which it operates. Hexagon is committed to sourcing responsibly and respecting human rights in its own operations and supply chain, extending beyond legal compliance. The [Hexagon Code of Business Conduct and Ethics](#) and [Hexagon Supplier Code of Conduct](#), which applies to all Hexagon employees and guides interactions with customers and suppliers, promote these commitments.

While Hexagon does not mine, trade or source minerals directly, it may be indirectly exposed via its supply chain. Thus, identifying the use of Conflict Minerals with its suppliers is part of Hexagon's commitment to responsible sourcing.

The term Conflict Mineral means columbite-tantalite (coltan, tantalum), cassiterite (tin), gold, wolframite (tungsten) or their derivatives; or any other mineral or its derivatives determined by the Secretary of State to be financing conflict in Democratic Republic of Congo or an adjoining country, as defined by the Dodd-Frank Wall Street Reform and Consumer Protection Act¹.

Hexagon takes reasonable efforts to avoid use in its products of raw materials that directly or indirectly finance armed groups who violate human rights. Hexagon works together with its suppliers to manage raw materials and to increase the transparency by investigating and determining the source of 'Conflict Minerals' in the supply chain as an important first step for making any improvements.

Hexagon, to best of its knowledge, represents and certifies that it does not receive any materials or products containing cassiterite (tin), coltan (tantalum), wolframite (tungsten) or gold (known as "3TG minerals") sourced from the Democratic Republic of Congo or adjoining countries.

In case of breach with this Policy, Hexagon will engage with the breaching party and take appropriate corrective action. Significant or recurring breaches, without corrective actions and remedy, or lack of cooperation, could result in Hexagon's reduction or termination of business with the breaching party.

Hexagon is committed to:

- Continuously identify which Hexagon products that may be exposed to Conflict Minerals.
- Continuously identify suppliers that provide components and products likely to contain Conflict Minerals, and require them to, on annual basis, complete a Conflict Minerals Reporting to conclude traceability of the mineral.
- Deploy best efforts around responsible business and due diligence measures to its suppliers where appropriate, which includes guidance on responsible sourcing of minerals.
- Ensuring that all suppliers adhere to the Hexagon Supplier Code of Conduct, taking reasonable efforts to avoid use in its products of raw materials that directly or indirectly finance armed groups who violate human rights.
- Ensuring that all suppliers undertake due diligence within their supply chain, that they document the source of origin of the minerals contained in the products provided to Hexagon and respond to Hexagon inquiries regarding existence of Conflict Minerals in Supplier products.

Hexagon's actions are:

- Developing and implementing a Sustainability Program within Hexagon.
- Developing and implementing a strong supplier qualification process which includes the monitoring of Conflict Minerals in its supply chain.
- Encouraging its suppliers to use the OECD Due Diligence Guidance² in order for them to determine the source and chain of custody of the Conflict Minerals in the assemblies, parts or components supplied to a Hexagon entity.

- Expecting its suppliers to respond to Hexagon inquiries regarding existence of Conflict Minerals in its products.
- Training its suppliers on Hexagon standards in relation with sustainability including Conflicts Minerals.

Raising Concerns

Supplier is expected to promptly notify Hexagon of any violation or suspected violation of this Policy by reporting the matter to your Hexagon business contact. If this is not appropriate, Supplier can report the matter to Hexagon's compliance team via email at compliance@hexagon.com, or directly via telephone, text or email to Hexagon's Chief Compliance Officer. Hexagon prohibits retaliation against persons reporting a potential or actual violation in good faith. The integrity of the reporting process is taken very seriously, and as such, your identity as the individual reporting the suspected violation will, wherever possible, not be revealed to local-level personnel.
