

Ten Reasons to Transform Your Human Procedures with j5 Operations Management Solutions

j5 Operations Management Solutions are a world-class operations management platform used by multinational companies across the world.

Here are **ten reasons to transform your human procedures with j5 Operations Management Solutions.**

For more information on j5 Operations Management Solutions, please visit

www.hexagonppm.com

1. Improved Health and Safety Processes

The formalized, efficient, repeatable and auditable HSE processes within j5 Operations Management Solutions reduce the risk associated with Shift Handover and other hazardous processes. j5 Operations Management Solutions gather relevant shift end information and enable safety checklists to be completed by operators before handing over shifts.

2. Fewer Human Errors

Improved communication means fewer human errors. This leads to improved production, less maintenance, reduced losses and fewer customer complaints. j5 applications – such as j5 Operator Rounds – can guide personnel through their daily tasks, ensuring that nothing critical is missed in the day-to-day operation of an industrial plant. This is a flexible yet consistent process when using j5 IndustraForm® Templates, which are developed in a patented spreadsheet-like environment.

3. Enterprise-wide Visibility

j5 Operations Management Solutions improve coordination because j5 Operations Logbook entries are immediately available to authorized users, whether onsite or offsite. Users can view current and historic logs using off-the-shelf query tools, drill-down capabilities and filters. j5 Operations Management Solutions enable an enterprise approach because managers and operations teams are always aware of critical plant activity through notifications and j5 Dashboards, Reports and Views.

4. Increased Efficiency

j5 Operations Management Solutions standardize processes across the plant and data entry can be automated where possible. j5 Operations Logbook data

is easy to retrieve from any web browser – globally – without any additional software. Logs can be color-coded for easy identification, and searching and finding critical data is simple. j5 Operations Management Solutions also guarantee critical fields are completed, checks spelling, eliminates double data-entry and performs automatic calculations, enhancing accuracy.

5. Connection with Other Plant Software

j5 Operations Management Solutions can read and write data automatically from software such as the DCS, SCADA, the CMMS, Data Historians and LIMS. This provides operators with a single user interface for maintenance information, real-time data and many other useful information sources. j5 connectors are available with the OSIsoft® PI System®, AVEVA® Historian, Aspen InfoPlus.21® (IP.21), SAP® PM, SAP HR, IBM Maximo® and other industrial software.

6. Raised Employee Accountability

j5 Operations Management Solutions record the date and time when each user makes a log entry or revision. They also allow for digital signatures at shift handover and other role-based procedures as required. j5 Operations Management Solutions have unlimited scope for adding users with varying rights. These can be configured to restrict viewing, log entry / modification, area access, applications and more. The measurement and monitoring of human process KPIs is also possible.

7. Excellent Flexibility

j5 Operations Management Solutions facilitate the development of new applications and the adaptation of existing j5 applications to the changing needs of an organization. Custom fields, categories, attachments (documents, files, images, notes etc.), data sources,

role-based workflows and reports can be added with ease. The j5 IndustraForm Templates capability to transform troublesome paper, forms and spreadsheets into enterprise-level applications brings the flexibility of the platform to another level.

8. Detailed Reporting

j5 Operations Management Solutions deliver standard dashboards, reports and views and the ability to customize reports for different stakeholders. There is also an ability to create schedules and distribution lists. Multiple logbooks and sites can be consolidated and categorization and analysis is facilitated. Offering a high quality and rich view of operations information that can be exported to analysis tools like spreadsheets.

9. Continuous Application Development

Evolving and developing in-house operations management software can be very difficult. In the modern IT world, keeping up with the latest technology is getting more and more challenging with the increased speed of innovation. j5 Operations Management Solutions are continually developed by specialists who have been enhancing this digital platform for many years.

10. Internationally Tried and Tested

j5 Operations Management Solutions is a suite of world-class Shift Handover, Operations, Process Safety, Compliance and Mobile software which is used by multinational companies such as AGL Energy, Calpine, Infineum, INPEX, JXTG Nippon Oil & Energy, Saudi Aramco, Thames Water and many more. j5 Operations Management Solutions is used by over **85%** of the Downstream and **100%** of the Upstream Oil and Gas assets in Japan. As a result, the solution has been developed in industries with a strong continuous improvement (Kaizen) philosophy.

About Hexagon

Hexagon is a global leader in sensor, software and autonomous solutions. We are putting data to work to boost efficiency, productivity, and quality across industrial, manufacturing, infrastructure, safety, and mobility applications.

Hexagon's PPM division empowers its clients to transform unstructured information into a smart digital asset to visualize, build and manage structures and facilities of all complexities, ensuring safe and efficient operation throughout the entire lifecycle.

Hexagon (Nasdaq Stockholm: HEXA B) has approximately 20,000 employees in 50 countries and net sales of approximately 3.9bn EUR. Learn more at [hexagon.com](https://www.hexagon.com) and follow us @HexagonAB.
