

j5 Work Instructions Overview

The Problem

Every day on an industrial site, there is a stream of work instructions issued by planners, maintenance personnel, operations supervisors and controllers at all levels and areas within the process. Unfortunately, there are still inadequate, time-consuming methods such as paper, word processor, spreadsheet and homegrown applications being used to plan and complete these work instructions.

Poor traditional work management methods are not integrated with other software, such as Data Historians and CMMS systems, resulting in dual capture and information silos. This increases organizational risk and inefficiencies.

How j5 Work Instructions Provided the Solution

To remedy these pains, companies across the world utilize j5 Work Instructions. This allows their operations teams to plan, record, manage, view and complete any work instruction in a consistent and efficient way with a web browser and mobile device.

j5 Work Instructions users have reported the following benefits:

- Easy to use
- Consistent work instructions
- Wide visibility of operations data
- Eliminates paper, spreadsheets and scattered databases
- Saves time and improves accuracy
- Advanced workflow capabilities
- Fast search and filtering
- Integration with other industrial systems
- Ease of monitoring
- Integration with other j5 Applications

“We rely on j5 for logbook, handover, work instructions, standing orders, near misses and mobile inspection rounds. We would like to extend our use of j5 to other applications in the future.”
