j5 Shift Handover Overview

The Problem

Poor shift handover processes have caused catastrophic incidents, creating an important requirement for more efficient, consistent and detailed data at this crucial point of day-to-day operations. Unfortunately, there are still inadequate, time-consuming tools being used during the shift handover process, which increase organisational risk and inefficiencies, such as:

- Paper
- Spreadsheets
- Word Processor Documents
- Scattered Databases
- Email / Text / Instant Messages
- Whiteboards
- Inconsistent Verbal Meetings
- Phone Calls / Radio
- Multiple MES Applications
About Hexagon

Hexagon is a global leader in sensor, software and autonomous solutions. We are putting data to work to boost efficiency, productivity, and quality across industrial, manufacturing, infrastructure, safety, and mobility applications.

Hexagon’s PPM division empowers its clients to transform unstructured information into a smart digital asset to visualize, build and manage structures and facilities of all complexities, ensuring safe and efficient operation throughout the entire lifecycle.

Hexagon (Nasdaq Stockholm: HEXA B) has approximately 21,000 employees in 50 countries and net sales of approximately 3.9bn EUR. Learn more at hexagon.com and follow us @HexagonAB.
