Monitoring mode operation

## 1. Turning the display On/Off

There are two ways to start operating in monitoring mode:

- Automatically, when the vehicle starts;
- Using the power button.

It is recommended to shut off the vehicle before turning off the display.
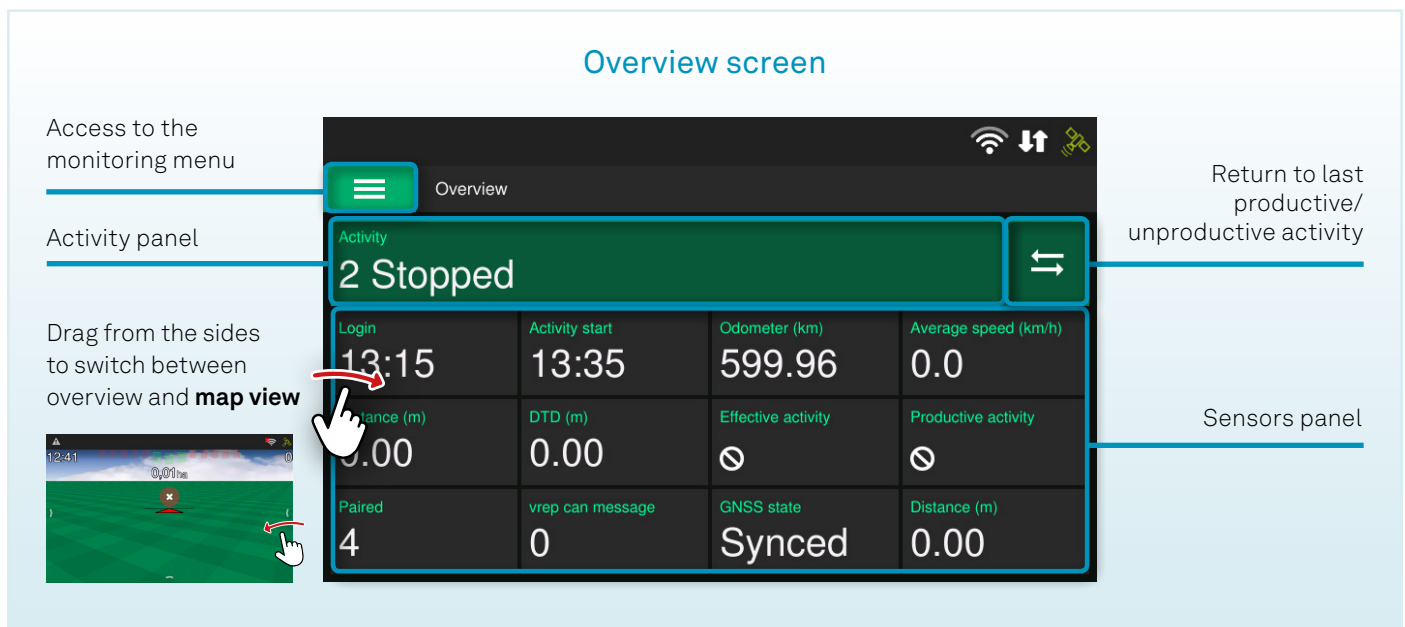

2. Login

The login screen is presented when the system finishes loading.

Enter your login and password.

The system only accepts logins that have been registered in the database.

Overview screen

Access to the monitoring menu

Activity panel

Drag from the sides to switch between overview and **map view**

Login	Activity start	Odometer (km)	Average speed (km/h)
13:15	13:35	599.96	0.0

Distance (m)	DTD (m)	Effective activity	Productive activity
0.00	0.00	⊘	⊘

| Paired	vrep can message	GNSS state	Distance (m)
4	0	Synced	0.00

3. Customizing sensors

To open a sensor's custom options, press and hold a sensor for two seconds.

You can **remove a sensor** by pressing the upward red button (delete button). The sensor will be replaced by an empty sensor.

To **expand a sensor's width**, press the resize button and select a number of slots. The quantity of available slots is limited to the number of subsequent empty sensors.

To **create a new sensor**, touch an empty sensor.

Change sensor width

4. Monitoring settings

To access the monitoring settings, touch the **Settings** option in the monitoring menu.
5. Monitoring tools

Touch the **Tools** option in the monitoring menu to access the **manual tree counter, data export** and other available tools.

Monitoring menu

To access the monitoring menu, press ☰ in the upper left corner of the screen.

You can access the activity selection screen, the monitoring settings, the tools screen and **logout option.**

To exit the overview and go to the operation screen, press **Map view**.

To close the menu, touch anywhere outside the panel.

## 6. Selecting an activity

While a valid activity isn't selected, the activity panel is presented on a red background.

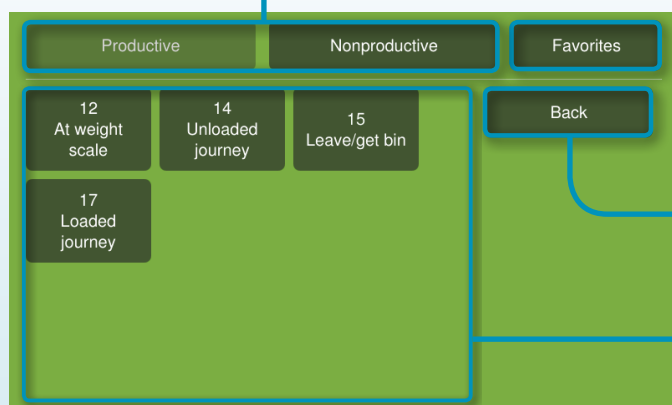

Press the panel to go to the **activity selection screen**.

When you select a valid activity, the background color changes to green.

Alternatively, you can go the activites screen by pressing Activities in the monitoring menu.
