

MATERIALS MANAGEMENT MADE EASY

TRAVELLING AROUND THE WORLD: WHERE IS MY STUFF? *LOGISTIC/TRAFFIC AND THE PORTAL*

Regardless of the size of a project, you must have the right materials at the right time in the right place. These are crucial requirements for the success of all projects. It is also vitally important to know where your materials are.

A good logistics module enables you to track and monitor every piece of material starting from placement of a Purchase Order throughout all the transportation routes to the final destination.

With the help of our modern Logistics Packing and Shipment solutions, you can obtain a convenient way of coordinating, managing and monitoring your suppliers' and freight forwarders' activities in a Portal by making all data transparent and visible at any time.

Are you worried about transmittal documents? No problem! Our Traffic Vendor Data Requirement concept enables you to predefine various types of documents you expect from your

supplier or freight forwarder and moreover you can even specify conditional document types such as materials that require special treatment like heavy lift object (HLO) and/or hazardous.

To make sure you don't lose any information and that nothing happens without your attention and explicit decision, all attached documents and provided packaging details must be acknowledged and approved.

Have you overlooked anything and accidentally approved a Packing List or acknowledged a document? Our solution allows you to step back and reverse the approval unless committed downstream activities have already been fulfilled.

Do you need to get in touch with your supplier and freight forwarder? Our new Traffic solution allows either you or your clients to directly initiate conversation within the portal using our built-in chat feature.

Costs are critical parts of all projects. As everyone knows, there are large varieties of cost elements tightly related to logistics activities. Our Intergraph Smart® Materials Portal enables your freight forwarder to assign any type of cost elements to any transportable objects. It can also provide you all logistics invoices to verify and cross-check against the planned budgeted costs and decide to provide your approval or rejection.

With a given periodicity, ideally monthly, your freight forwarder is entitled to provide you regular invoices that summarizes all approved logistic invoices within that given time period. Our solution is fully equipped and supports such periodic invoices that after official approval can be handed over to your financial department for payoff.

ABOUT HEXAGON

Hexagon is a global leader in digital solutions that create Autonomous Connected Ecosystems (ACE). Our industry-specific solutions create smart digital realities that improve productivity and quality across manufacturing, infrastructure, safety and mobility applications.

Hexagon's PPM division empowers its clients to transform unstructured information into a smart digital asset to visualize, build and manage structures and facilities of all complexities, ensuring safe and efficient operation throughout the entire lifecycle.

Hexagon (Nasdaq Stockholm: HEXA B) has approximately 20,000 employees in 50 countries and net sales of approximately 3.8bn EUR. Learn more at hexagon.com and follow us @HexagonAB.
